The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Bosch (DE('900).

In particular, the examiner has reread the abstract of the reference and has considered the abstract in light of the comments and rejections of the PCT examiner. The foreign examiner's claims were substantially identical to the claims now pending and those claims were considered anticipated by Bosch. It is therefore necessary for the applicant to point out how his current claims differ from the teachings of Bosch.

Applicant's arguments filed 4/11/07 have been fully considered but they are not persuasive. In particular, as noted above, read in light of the foreign examiner's rejection, the abstract of Bosch seems to imply that the energization is changing as the applicant claims and that the reference anticipates the current claims.

Since this rejection was not precipitated by the applicant's amendment, this action has been made non-final.
